FPC Service & Flash Programmer

The record-usa FPC902 flash programmer is an ingenious tool that puts unmatched technology directly into the hands of your authorized service technician.

FPC Service and Flash Programmer:

- Simple plug in device that allows one to quickly and efficiently make needed adjustments to the door
- Prevents unauthorized and untrained technicians from working on the door and possibly setting speed parameters outside of those as defined in ANSI standards
- Highly sophisticated programming and service tool for your certified installer/technician.
- Identically program and configure multiple door systems throughout your building.
- Update software in the control to ensure the very latest technology is always available to you.
- Allows certified technician to maintain complete service and repair data over the life of the door.
- Maintains an error history of identifying issues with the door that assists the end user in determining replacement costs
- Error history is also beneficial to service technician in understanding abuse, weather related issues or failure
- Allows defined door parameters to be saved and uploaded on any other door in your building
- May be programmed to remind the installation operator that maintenance on the door system is due
- Ensures door is always in compliance and safe by preventing individuals unfamiliar with ANSI standards from making improper adjustments
- To ensure your door is complaint, safe and properly adjusted to ensure long life, demand the record series 8100 with the FPC902
